HITCH HOOK

The Henriksen Hitch Hook is a hook for anchoring a loose rope to the bow of a working boat. The hook is an on-load hook with a load capacity of 2,500 kg in a pull horizontal and up to 45° from horizontal. The hook has the capacity to release at any load within the load capacity.

SAFETY FEATURES

- Factory overload tested and certified
- Safety factor 4w
- Easy to install
- Easy to use
- Use with rope, wire or steel rings
- On-load release up to full SWL in all working angles
- Little to none maintenance needed
- Re-certified by manufacturer every 5 years

HIGH QUALITY

The HHH hook is made of only high grade stainless steel, which is the same material that is qualified to be used in Life Saving Appliances according to SOLAS. This makes the HHH hook almost maintenance free. The HHH can be mounted in the marine environment (salt water proof) without the need of any coatings or protection. All Henriksen Hooks are delivered in a practical wooden box.
The HOOKS on this page are all tested and delivered with product certificate and Type Approval Certificate from Det Norske Veritas (DNV) according to DNVGL-ST-0378.

For more information please visit: www.hhenriksen.com

**WORKING ANGLES**

Vertical: From 0° to 45°

Horizontal: The direction of the load should be aligned with the axis of the boat.
