

LADCARB FIX-LITE SECLAD

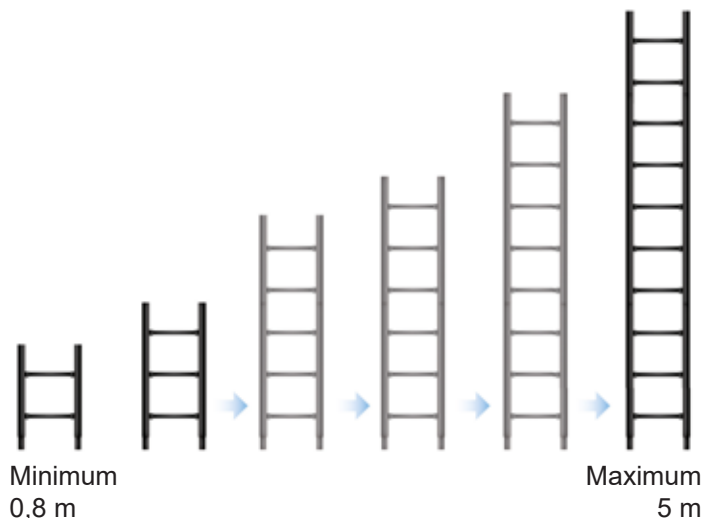

In order to provide more length options and further reduce the weight, we have developed an absolutely unique design of ultra-light sectional ladders consisting of 2 different sections (2-rungs and 3-rungs) offering an unbelievably wide range of length options. These ladders offer a perfect solution for tactical operations like entering buses, trains, buildings with different window-heights etc.

CAPABILITIES AND SPECIFICATIONS

- Thanks to this new design, we are able to offer sectional ladders from 0.8m up to 5.0 m (by 0.3 m).
- When folded, a 5.0 m long ladder dimensions are only 1.0 x 0.46 x 0.3 m.
- Mechanical endurance tests performed at extreme conditions (+60°C/-40°C).
- Fully compatible with all LADCARB accessories including assault platform adapters.
- All materials tested for use in a marine environment.
- Floating in fresh and salt water.
